TOOL SHEET

Coursera

an online learning platform.

Description

Courses on Coursera are generally designed and taught by renowned experts in their field. They are structured in the form of video modules, readings, practical exercises and assignments to help learners acquire specific knowledge and skills. Some courses also offer practical projects and assessments to put what has been learned into practice.

One of the special features of Coursera is its flexibility. Learners can follow courses at their own pace and according to their own timetable, enabling them to reconcile learning with their professional and personal commitments. What's more, most courses are available free of charge, but it is also possible to obtain paid certification to validate your skills

Use

Go to the Coursera website and create an account by providing the necessary information.

Browse courses: Explore the library of available courses and filter them according to your interests, field of study or skill level.

Choose and enrol in the course: Once you have found a course that matches your needs, enrol. Some courses are available on specific dates, while others can be taken at your own pace.
