## DIMPA MOOC

The DIMPA MOOC (Digital Innovative Media Publishing for all) is a digital resource with free access and aims to train learners and other educational actors (tutors, trainers, etc.) on practices and tools for new possibilities of publishing enhanced content.

### Description of the tool

This MOOC aims to respond to the growing demand for training in new digital publishing technologies by focusing on the key points of learners' expectations: What (new) working methods? What tools are available? How much do they cost? What are the benefits and how can they be measured?

At the end of the course, we aim for the learner to be able to define and implement a digital strategy for the creation of rich content in the context of their professional activity.

Specifically, learning focuses on 6 digital tools: Epub, Augmented Print Materials, Interactive Videos, Immersive Videos, Augmented Reality and Virtual Reality.

### Use of the tool

In the MOOC you can find tutorials to learn how to use each of these six digital tools, but also some tips for the development and implementation of these tools. At the end of each section there is a knowledge test that allows you to validate your learning.

### → Access

To access the tool go to:  
<https://www.dimpaproject.eu/mooc/>

### → Material

### → Public

Any public wanting to know about new digital creation tools.

### → Level

### → Languages

French, English, Spanish, Greek and German.

### → Partners

Logopsycom (BE), BFI OOE (AU), Les Apprimeurs (FR), AKETH (GR), CEPS Projectes Socials (ES), MBCF (FR)
