

# TOOL SHEET

## DUOLINGO

DUOLINGO is a website and mobile application that allows you to learn languages for free in a fun way.

### Description

You want to learn or revise a language but you don't have much time or resources to do it? Duolingo is the right tool for you!

### Use

The language learning is structured in different levels. In each level, you are offered different units on specific grammar or vocabulary topics, each consisting of different lessons. Duolingo offers short, fun sessions for the written exercises.

When you start the application, you commit to working for a certain amount of time per day (between 5 and 20 minutes). After a level test, you are told how much progress you need to make each day in "experience points" to reach your goal.

Duolingo uses a very playful teaching method with mechanisms found in video games (you earn points, rewards, etc.).
