

# TOOL SHEET

## SUBTITLING OF VIDEOS

Video subtitling is a tool that will allow you to make your videos more accessible, because they will be translated into other languages.

### Description

This tool will allow you to make your videos accessible to a much wider audience around the world. The objective is that you can become able to subtitle a video, and that you can follow the evolution of digital technology. This tool will also give you access to more videos from around the world made in other languages. You will then be able to understand the content and get more information from different sources.

### Use

Once you are connected to your Youtube channel, the use is simple. By launching a video, it is by clicking on the "subtitles" icon (at the bottom right of the YouTube projection screen) that you will be able to discover in which language(s) the video is subtitled, and to select the desired subtitle language.

### Testimony

Click on the TV on the right to discover a video testimony:

#### → Access

First you need to create a channel for free on YouTube. Once your video is saved on your channel, you have access to the subtitling tool.

#### → Equipment

#### → Public

Accessible to all

#### → Level

#### → Video tutorial
