

# TOOL SHEET

## SPORTEASY

Sporteasy is an application that facilitates the organisation of team sports.

### Description

You practice a team sport, Sporteasy is a community application to share with your teammates.

You will be informed of upcoming training sessions, invited to matches and you will be able to exchange with your teammates and your coach.

Sporteasy is a French innovation adapted in 6 languages for a European deployment.

### Use

Once your account is created, you join your team online. You are called for a training session or a match, you receive an email and/or a notification on your mobile. You just have to click on "present" or "absent" and the team composition is updated.

The coach can also make statistics on the mistakes and successes of the players, on the matches won or lost. A fun option, you can rate your teammates after each match and vote for the player of the match!

The paid version allows a club to register several teams with the same account and to have an unlimited number of registered players.

### Testimony

Click on the TV on the right to discover a video testimony :

### → Access

Download the application from the App Store (on an Apple device) or the Google Play Store (on an Android device)

### → Equipment

### → Public

Accessible to all

### → Level

### → Vidéo tutorial
