

# TOOL SHEET

## YOUTUBE STUDIO

Youtube Studio is a platform for video makers which allows you to edit and share videos publicly on Youtube.

### Description

Become a real Video Maker with Youtube Studio and share your videos to the world ! Whether it's a tutorial, a vlog, a marketing video or just a funny video you would like to share with your friends and family, Youtube Studio will allow you to add them onto Youtube for free.

### Use

Youtube Studio allows you to post videos privately or publicly on Youtube and create Youtube channel, which looks a lot like a miniature WebTV.

You'll be able to add sound to your vidéo thanks to their infinite sound library; create a visual identity for your channel ; sub-title your videos automatically and translate them in as many languages as you want.

Once the video will be posted publicly, you'll be able to share it to your friends, family and more on social media. Youtube will also allow you to analyse and interact with the people viewing your videos.

### Testimony

Click on the TV on the right to discover a video testimony:

#### → Access

Access Youtube Studios by selection "Your Videos" on the Youtube menu or by typing out "Youtube Studios" on a search engine.

#### → Equipment

#### → Public

Anyone wanting to publish videos online
