Description

Filming with your Smartphone allows you to capture moments with your family, friends or strangers. You can use it to make interviews, vlogs (video blogs) or a tutorial. Be creative !

Use

To film with your Smartphone, you just need to open you camera app on your phone. Once it's open, get onto the video mode and press on the red button to start filming. When you're done, press on the same button to end the video. You'll find your videos in the "gallery" app.

A few tips & tricks:

- Try filming horizontally. The image will look better.
- Choose the full HD mode for a better video quality.
- A stabilizer will help you make more stable videos (DJI Osmo for example).
- If you want a better sound quality, you can use a wireless microphone or even just headphones with an integrated mic.

Testimony

Click on the TV on the right to discover a video testimony:
