

TOOL SHEET

MAKE YOUR CINEMA

The shoebox projector is a tool that will allow you to view your videos and photos in cinema format, without having to spend large sums to buy a video projector.

→ Access

To get started with this design, you first need to get the necessary materials to make the home-made projector.

→ Equipment

A shoebox, a magnifying glass, a cutter, black paint (e.g. spray paint), adhesive tape, putty, a sofa and lots of pillows

→ Public

Accessible to all

→ Level

→ Video tutorial

Click on the monkey wrench:

Description

This tool will allow you to distribute your work or the work of someone else, and to find yourself with relatives (or less close) like in the cinema! The goal is for you to reinvent cinema at home, and to develop manual and creative skills.

Use

Once the projector is made, start the film you want, or start the photo slideshow you want, sit on your sofa with lots of pillows and popcorn, and... enjoy the projection! Enjoy!
