

# TOOL SHEET

## MAPS ME

Maps Me, a free offline mapping application that offers an offline navigation and attraction discovery service.

### Description

Maps Me is a map of the world that can be downloaded by zone. Without even having a wifi connection, you can see on the map the hiking trails, places of interest in the area and infrastructure (train stations, hotels, banks, etc.). You can also save the places you've discovered, the route you've taken or share it with friends. It's an essential tool for travelling without a wifi connection !

### Use

When you download the application, zoom in on your current location and the application will suggest you download a map of your region. You can then use the map to find hiking trails and places of interest, even without Wi-Fi.

### → Access

Download the software to a page in your web browser or on your smartphone
