

TOOL SHEET

SayHi

SayHi is an app which allows you to translate what you write or talk or hear and even text in photos many-many languages. It uses automatic speech recognition, text-to-speech and image recognition.

Description

Take advantage of this opportunity to talk to almost anyone. Whether you are at home or abroad, if you want to understand and communicate, you can do so free of charge. Language is no longer a barrier.

Use

SayHi is an app that can be used in two main ways. Firstly, it can instantly translate what a person tells you and what you are saying to the person you are talking to. Also, it can translate your voice or what you are typing in any of 101 languages that includes. You can use it either when you are abroad, or if someone asks you for information in a language you don't understand. In any case, the response speed is phenomenal, and you only need your phone, the SayHi app, and an internet connection.
