Tinkercad

Tinkercad is a free online tool that will introduce you to the world of 3D modeling and design. Tinkercad has a simple and intuitive interface that makes this software the best option for all ages to start designing in three dimensions.

Description

If you're looking to get to grips with 3D modeling software, without getting lost in complex and sophisticated interfaces, Tinkercad is for you. It is a tool created to be used mainly by students and users who want to start designing and printing their own 3D objects.

This tool will allow you to go from thinking in 2D to visualizing objects on a three-dimensional plane. Another strong point is that working online, all your work will be saved and you will have the possibility to share your designs with other users. This last point is particularly relevant if you want to use this software for professional or educational purposes.

Tinkercad also allows you to be part of a large community of users that continuously generate new content and tutorials, thus improving the knowledge and possibilities of this tool.

Use

In order to use this tool, we advise you to start by watching the tutorials that you will find on the interface when you log in. Then it will open the doors to 3D printing, vinyl cutting and CNC milling.
